

METHOD, SYSTEM, AND APPARATUS FOR
EXPOSING SERVER PROPERTIES TO A CLIENT APPLICATION

Abstract

5 A method, system, apparatus, and computer-readable medium are
provided for exposing and utilizing property values maintained at a server computer. A
request is received at the server computer for a resource, such as a Web page. In
response to receiving the request, a determination is made by the server computer as to
whether a property value maintained at the server computer should be returned with the
10 resource. If the property value should be returned with the resource, the current value of
the specified property is retrieve and is rendered into the resource as a variable statement
specifying the current value of the property. The resource, including the variable
statement, is then returned to the requesting application where it may be utilized.
